

Committing Construction to a Healthier Future

About the HCLG

Mission

To unite the construction industry in order to eradicate ill-health and disease caused by exposure to health hazards on building sites.

Vision

To make construction the leading industry for occupational ill-health and disease prevention by 2025 – the construction industry initiative.

Plan

To achieve a cultural shift within our sector, so that we manage health like safety.

What we do?

Plans and priorities

Our role is to act as both a stimulus and a catalyst in helping unify the industry in its approach to worker health protection and the promotion, adoption and implementation of best practice processes and initiatives.

To our 2025 vision the HCLG will focus on the following key areas, and has set up a task group for each:

1. Design for Health
2. Respiratory Disease
3. Mental Health
4. Musculoskeletal Disorders
5. Health Data

Balfour Beatty

Who are we?

The HCLG is comprised of contractors, clients, the Health and Safety Executive, professional bodies, trade associations and trade unions, including the following organisations, plus another 165 members.
